

BUILD CONFIDENCE IN YOUR OVERHEAD DISTRIBUTION SYSTEM

Unified platform for the design,
analysis & management of
overhead transmission &
distribution systems

The utility industry is facing a rapidly changing environment, including unprecedented storms, increased regulatory scrutiny, stringent safety code requirements, an aging infrastructure, expanding communication infrastructure, grid modernization and resiliency programs. To minimize the negative effects of these changes, utility companies need to better understand the structural health and integrity of their systems and processes.

SPIDA Software's Structure Management System addresses the industry's need for a comprehensive platform to manage the lifecycle of overhead assets. Unlike traditional asset management solutions, SPIDA's Structure Management System is scalable and targeted at the challenges presented by today's changing climate. Whether it is leveraging the digital twin of each asset to drive efficiencies across other organizations or managing the complex interactions at the asset level; SPIDA's Structure Management System builds confidence in your overhead distribution system.

SPIDA's Structure Management System is ideal for the following:

STRUCTURAL ENGINEERING COUPLED WITH STRATEGIC MANAGEMENT OF UTILITY ASSET DATA

SPIDA Software's Structure Management System can be deployed independently or as an enterprise suite, and encompasses the following solutions:

SPIDAcalc is the industry's trusted structural analysis and design software. Using its powerful geometric nonlinear, pole loading, pole strength, and clearance analyses, SPIDAcalc brings awareness to asset health and ensures safety code compliance.

SPIDAstudio is the first scalable, cloud-based platform to centrally document and manage the physical health and condition of overhead distribution systems. Providing a single platform to manage work processes, analyze and track data, SPIDAstudio streamlines your business and optimizes your investment in overhead assets.

CODE COMPLIANCE

Build confidence in your safety code compliance

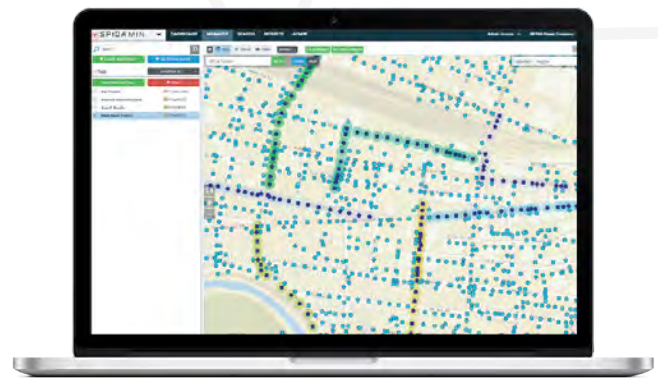

ASSET HEALTH

Mitigate your risk with increased awareness of the health of your assets

OPTIMIZE INVESTMENTS

Optimize your investments on overhead assets without compromising safety

Go **beyond pole loading** with the industry's trusted software.

Cloud-based solutions to analyze, store and manage your asset data.
